

JINDAL'S

POWER TO YOU

MICA CAPACITORS

ROCK SOLID PERFORMANCE FOR HIGH RELIABILITY APPLICATIONS

Jindal Rectifiers is one of the leading manufacturers of electronic components like MICA Capacitors, EMI filters and LED based lamps. Jindal Rectifiers gained technical expertise for manufacturing of MICA capacitors through Sangamo Capacitor Division, a Schumberger Company way back in 1973.

THE JINDAL'S PRODUCT RANGE

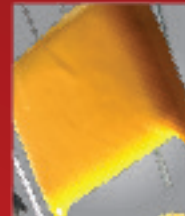

Carefully designed with adequate safety margins to provide maximum capacitance in the smallest volume with excellent mechanical, electrical and environmental characteristics. The design parameters provide enhanced stability, reliability, low loss, close tolerances, low temperature coefficients, high insulation resistances etc.

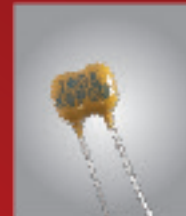

DIPPED RADIAL MICA CAPACITORS

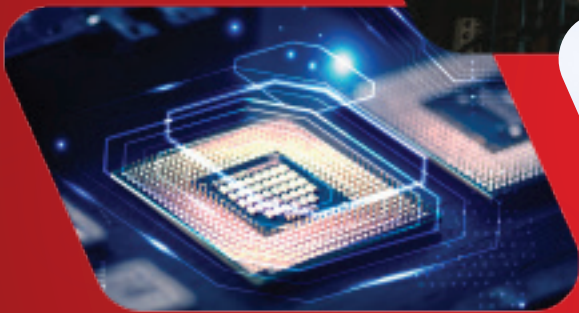

MOULDED AXIAL MICA CAPACITORS

MOULDED RADIAL MICA CAPACITORS

MINIATURE DIPPED MICA CAPACITORS

WIDE RANGE OF APPLICATIONS

- Ground control & space flight equipment
- RF and communication networks
- Interference suppression devices
- Data processing and computers
- Satellite communication
- Aero Space Avionics
- Defence applications
- Missile applications
- Telecommunications
- Navigation aids
- Delay lines
- Radars

JINDAL'S PRODUCT RANGE

Automatic Voltage Controllers

Silicon Powered Rectifiers

Special Purpose Transformers

EMI Filters & Connectors

MICA Capacitors

LED Lamps & Lighting Systems
